TO-DAYS DOLLAR.—The closing rate of the dollar on demand, to-day was 1/8½d.

PRICE \$3.00 Per Month.

MUSLIM SITUATION IN DELHI.

Number of Convictions
Decreased.

SATISFACTORY REPORTS.

Rugby, Yesterday.
Answering a Parliamentary question regarding the political situation in India during the past week, the Secretary for India, Sir Samuel Hoare, said that the broad effect of reports from the provinces indicated a marked improvement in several directions.

The Muslim situation in Delhi, which was the cause of anxiety last week, had settled down better than was expected. There had been little trouble during the present week and the number of convictions in some provinces appeared to be now definitely on the downward grade.

The tribal situation was clearing up better than was apprehended. Reactions of trans-frontier activities had been only local in the North West Frontier Province and had been set off by improvement in other directions.—British Wireless Service.

DANUBIAN STATES QUESTION.

Closer Economic Relations.

Rugby, Yesterday.

The Foreign Secretary, Sir John Simon, replying to a question, said that the subject of closer economic relations between Danubian States with a view to assisting their financial recovery was under the active consideration of the Powers principally interested, including ourselves.

He could make no announcement at the moment but gave assurance that the work of the Ottawa Conference would not be prejudiced.—British Wireless Service.

BUSINESS MEN TO GO TO OTTAWA?

The Matter Now Under Consideration.

Rugby, Yesterday.

The Prime Minister was asked in the House of Commons whether it was proposed that selected business men should accompany the Ministers to Ottawa for the Imperial Conference. He said that the matter was at present under consideration.—British Wireless Service.

SOLDIER'S LEAVE CANCELLED.

Obtained Credit by Fraud.

AT LOCAL RESTAURANT.

Arrested by virtue of a warrant, Stanley Charles Beresford (28), a private in the Royal Army Service Corps, made his appearance before Mr. Wynne-Jones in the Central Police Court, this morning, on a charge of obtaining credit by fraud, other than by means of false pretences, at Lane, Crawford's Restaurant on Sunday last.

Mr. O. E. C. Marton appeared on behalf of the complainant firm. Defendant pleaded not guilty to the charge.

His Worship fixed the hearing of the case for March 29 at 11 a.m., granting bail in the sum of \$250. In the event of Beresford being unable to raise bail money, he is to remain in Military custody.

It is understood that defendant was to have sailed for Home yesterday.

THE SNIPING INCIDENT NEAR KIANGWAN.

JUST BEFORE COMMIS- SION'S ARRIVAL

FIRST FORMAL PEACE PARLEY FIXED FOR TO-MORROW.

BRIGHT PEACE PROSPECTS

(From Our Own Correspondent.)

Shanghai, To-day.

Chinese snipers fired on a party of Japanese soldiers and wounded an officer half an hour before the League Commission, escorted by a Japanese guard, reached the spot where the incident had occurred.

A sniper was killed when the Japanese returned rifle fire near Kiangwanchen.

DEVASTATED AREAS VISITED.

The most striking comparison that could be drawn with the devastated areas of Chapei, Kiangwan, and Woosung was the Western Front during the Great war, after the first visit of the war-torn areas by the Commission including the inspection of the Chenju University.

Members of the Commission asked many questions during the course of their investigations.

PEACE PROSPECTS BRIGHTER.

Definite steps have been taken to write finis to Japan's Shanghai Campaign with Monday's discussions resulting in the announcement of a first formal peace parley set for Wednesday. Whereas the previous negotiations had reached no concrete solution, Monday's Conference paved the way for a basis of common understanding. Peace prospects are now brighter than at any time before.

PLAIN-CLOTHES SOLDIERS.

(Reuter's Pacific Service.)

Shanghai, To-day.

It is learned to-day that activities on the part of snipers caused a last-minute change in the tour made by the members of the Lytton Commission of the war zone yesterday, but in spite of this precaution a Japanese officer was hit by a sniper at Kiangwan, not far from the spot where the party was sightseeing. The officer was wounded in the leg.

Soldiers conducted a search and located three snipers, one of whom they shot dead, but the others escaped.

The snipers are believed to be plain-clothes soldiers and the Japanese allege that many of them are active.

JAPANESE ARMY AND RUSSIA.

Repressing Activities Against the Soviet.

THE NEW GOVERNMENT.

Moscow, Yesterday.

Further queries by M. Karakhan elicited the assurance of Hirota that the Japanese Army on the Kwantung peninsula is closely watching the activities of the Russian White Guards and is prepared, if necessary, to repress political and insurgent activity against Soviet Russia.

Regarding the New Government in Manchuria, Japan re-affirmed the adherence to the principle of the open door policy.

TROTSKY'S NARROW ESCAPE.

Marooned on Lone Island.

HOLIDAY CANCELLED.

Constantinople, Yesterday.

Leon Trotsky, the exiled Russian leader, has been shipwrecked on a lone island called "the Dog" in the sea of Marmora.

He was a member of a fishing party when a sudden gust of icy wind known as "the Black Breath" drove the motor boat on to the rocks.

Trotsky and his two companions just managed to scramble ashore where they were marooned throughout the night exposed to the bitter cold in their shelterless haven. In the morning, however, they were rescued by a fishing smack.

Further Misfortune.

Prague, Yesterday.

Trotsky's luck appears to be out for the moment, for after a narrow escape from drowning, his long-hoped for holiday to a Czechoslovakian health resort has been cancelled at the last moment owing to the Turkish Government refusing to guarantee not to place any obstacle in the way of his return to Turkey.

The Czechoslovakian Government has consequently withdrawn its permission to enter Czechoslovakia.—Reuter.

FINER LATER.

The weather report issued by the Royal Observatory to-day states:—The anti-cyclone has weakened and is central near Nagasaki and moving Eastward.

Another is forming over S.E. Mongolia.

Forecast:—N. E. winds, strong, moderating; overcast at first, finer later.

MOTOR CYCLIST FINED.

Driving in Wyndham Street.

PROHIBITED THOROUGHFARE.

Before Mr. Schofield, in the Central Police Court, this morning, Mr. H. H. Mueller, of Siemens China Ltd., was summoned for driving his motor cycle in Wyndham Street on March, a thoroughfare which is prohibited to motors. Defendant pleaded guilty and was fined \$7.

Gas Co.'s Lorry Driver.

A fine of \$10 was imposed on the Chinese driver of a lorry, belonging to the Gas Company, on summons for carrying excessive persons, which he admitted. It is stated that he carried 23 persons in addition to several gas stoves, when driving along Stubbs Road.

Relying to the Magistrate, Traffic-Sgt. Clark agreed that the vehicle, at the time, was safe.

FATE OF LOTTERIES BILL AWAITED

TO BE INTRODUCED TO-MORROW

IRISH SWEEPS THREATENED BY PASSAGE OF BILL.

GOVERNMENT AID REQUIRED

(Reuter's Special Service.)

London, To-day.

Promoters of the Irish Hospitals Sweep are anxiously awaiting the fate of the Lotteries Bill in which the whole country is interested. Sir William Davison is to ask leave to-morrow to introduce the Bill in the House of Commons.

The promoters fear that the passage of the Bill will be a serious blow to the Irish Sweeps, which get most of their money from Britain. It is understood that if the Bill is passed efforts may be made by the Irish promoters to come to an agreement with those responsible for the promotion of British Sweeps whereby the two syndicates might run alternate sweeps.

Even should leave be given to-morrow the Bill will be unable to advance further unless given facilities by the Government.

The rejection of the Bill will be moved by Mr. Hopkin Morris, Liberal.

THE ROAD V. RAIL COMMITTEE.

Comprehensive Terms of Reference.

REPORT BY END OF JULY.

Rugby, Yesterday.

A Committee comprising of four representatives of railways and four of firms engaged in goods transport by road has been set up with comprehensive terms of reference as follows:—

"To investigate facts relating to the total costs of the highways system— including the regulation of trade—the incidence of those costs and contributions of different classes of users of mechanically propelled vehicles. To consider and report on the nature and extent of regulations, which in the view of modern economic development should be applied to goods transport by road and by rail, and in the light of any conclusions reached under these heads to make such further recommendations as they are able to frame, designed to assist the two sides of industry to carry out their functions under equitable conditions which would adequately safeguard the interests of trade, and industry and to report by the end of July."—British Wireless Service.

The Duke of York in a telegram to the Lord Mayor of London expresses deep regret at the destruction of this wonderful specimen of Welsh craftsmanship.

The furniture, which is in keeping with a model house, was in a separate vehicle and is safe. The house will be rebuilt.—British Wireless Service.

MINIATURE HOUSE DESTROYED.

Princess Elizabeth's Disappointment.

WELSH CRAFTSMANSHIP.

Rugby, Yesterday.

The miniature house which was designed and built in Wales and presented to the Duke and Duchess of York for their daughter, Princess Elizabeth, was destroyed by fire to-day when being transported by road to London for exhibition.

The Duke of York in a telegram to the Lord Mayor of London expresses deep regret at the destruction of this wonderful specimen of Welsh craftsmanship.

The furniture, which is in keeping with a model house, was in a separate vehicle and is safe. The house will be rebuilt.—British Wireless Service.

QUICKSAND RESCUE.

Three Embogged On River.

Alvai North (S. Africa): But for the presence of mind and courage of Mr. G. Feldenbloom, an employee in a local mill, the death of a four-year-old European girl in particularly tragic circumstances might have been the sequel to a picnic on the bank of the Orange River.

The child was crossing a little tributary to the main stream of the Orange River with some companions when she suddenly walked into a patch of quicksand and began to sink. Her companions called for help, and her father, seeing her plight, rushed towards her and was also caught in the quicksand.

Her mother also frantically dashed in, and she in turn became embogged.

Feldenbloom, taking in the situation, ran some distance up the Orange River, entered the water over hard ground and swam down the stream. Under the water at the spot where the child had been, the sand was firm, and he was able to pull her out.

With some assistance both her parents were able to reach hard ground again; and, save for shock, the trio were none the worse for their terrifying experience.

These suggested minimum standards are subject to slight alteration," a War Office official told the News Chronicle, "Tests have already started with a number of battalions, and the views of unit commanders are being obtained."

ANGLO - DUTCH RUBBER COMPETITION

Practical Difficulties Reviewed.

BRITISH PRODUCTION.

London, Yesterday.

In the House of Commons Sir Philip Cunliffe Lister read the rubber communiqué and remarked during the discussion that the whole position had been carefully reviewed in order to test the practicability of any scheme of restriction, but that a conclusion had been reached that the practical difficulties were such as to preclude the adoption of a comprehensive scheme with any reasonable prospect of success.

He considered this conclusion inevitable in the circumstances and it had been reluctantly accepted by both Governments concerned, and he was deeply indebted to the representatives of the rubber industry for their help during the negotiations.

[A Reuter's cable from The Hague on March 19 stated that a Government communiqué states that the English and Dutch Governments have come to the conclusion that it is impossible under present conditions to frame and operate an international scheme to guarantee the effective regulation of the production and export of rubber.

The British Colonial Office has issued a communiqué identical with that from The Hague.]

Mr. Campbell's Optimism.

London, Yesterday.

"British rubber companies, which are still able to exist, must continue to recognise, and I am quite certain that they will have no difficulty in producing at a considerably lower price than the Dutch."

This was the opinion expressed to-day by the Commoner, Mr. E. T. Campbell, who for many years was identified with the Dutch East rubber industry.

He added that the steady low price was always preferable and in the long run was more profitable than a continuously fluctuating and nervous market which had now prevailed for over a year owing to restriction negotiations.—Reuter.

Lowest on Record.

Rugby, Yesterday. A sharp break in the price of rubber followed the announcement that the proposals for the regulation of production or the export of rubber had been rejected.

The spot price was quoted at 17½d., the lowest on record, but it recovered later to 15½d. Rubber shares were nominal.—British Wireless Service.

THE SERGEANT - MAJOR "JUMPS TO IT."

Infantry's New Exercises.

Even sergeant-majors will have to "jump to it" under new physical training orders issued for infantry units of the British Army.

Officers, too—and cooks, and batmen, and all other supernumeraries.

To secure a higher standard of physical efficiency, every man under 30 will be expected to:

Clear a high jump of 4 feet.

Spring a long jump of 14 feet.

Run 100 yard in 13 seconds and a mile in 6½ minutes.

"These suggested minimum standards are subject to slight alteration," a War Office official told the News Chronicle, "Tests have already started with a number of battalions, and the views of unit commanders are being obtained."

ground again; and, save for shock, the trio were none the worse for their terrifying experience.

"YOUNG AS YOU FEEL."

"Young As You Feel," the long awaited Will Rogers' comedy drama, in which the popular screen star and comedian is seen for the first time as a model of what the well dressed man should wear, is showing to-day at the King's Theatre.

The story deals with the quite human and logical predicament of a kind and wealthy widower who finds his two wilful sons slowly getting beyond his control. They refuse to share the responsibilities of his large meat-packing business, but are very willing to spend its profits on their social and sporting activities.

After years of patience Rogers decides to beat his sons at their own game, and in the company of that delightful French comedienne, Fifi Dorsay, he visits an expensive tailor, and makes the rounds of the various night clubs, race tracks and other centres of pleasure.

His plan brings results, results that are not only surprising to Rogers, Fifi, and his sons, but which will also amaze you.

"Young As You Feel," which is Rogers' fifth starring Fox picture, is the talking screen's version of George Ade's well known stage play, "Father And The Boys." It is said to offer Rogers the best opportunity of his screen career to display his natural and homesy style of humour and to be the most human and hilarious character of all his pictures.

In addition to Miss Dorsay, the comedian is supported by a cast of first-class quality, including that celebrated character actor, Lucien Littlefield, Donald Dillaway and Terrence Ray, impersonate the two spoiled sons and Rosalie Roy and Lucile Browne are the feminine members of the youthful and romantic foursome. Another important player is Brandon Hurst, who recently played with Rogers in "A Connecticut Yankee."

Frank Borzage, who directed "They Had To See Paris," which marked the screen debut of both Rogers and Fifi Dorsay, directed the production.

"AROUND THE WORLD IN 80 MINUTES."

All the old and famous Fairbanks tricks and some new ones are included in "Around the World in 80 Minutes," the United Artists Super Special Feature, which will be seen at the Central Theatre to-day.

Those remembering "The Thief of Bagdad" will again witness a scene similar to the flying carpet sequence, the details of which have never been disclosed. "The Gaucho," in which Fairbanks did marvellous tricks while riding a horse, contributes its share to "Around the World," while all manner of camera magic has been added to make the travel sequences as entertaining as is mechanically and humanly possible.

L/CPL. PALMER AGAIN TRIUMPHS.

Defeats His Old Rival by Ten Yards.

RESERVE BURST DECIDES.

Lance Corporal Palmer, one of the two runners who dead-heated in the Kowloon Marathon last year, was again successful in the six mile event which was run in Kowloon yesterday evening. Private Jones-Rogers, the other winner of last year's event occupied second place.

A field of 23 runners, lined up at the Central British School for the race, and after a good start, the runners began to string out, Palmer and Jones-Rogers running abreast. Even in the very early stages of the race, it became evident that there were only a few who could possibly win, and it was not long before Palmer, Jones-Rogers, Robinson, A.B. Murphy and Sergeant Hyde had put considerable distance between themselves and the remaining participants. The two eventual winners were setting a hard pace which was maintained throughout the race.

At the end of five miles the field was still unchanged as far as the first five were concerned, but at Chatham Road, Robinson, who was still running strongly began slowly to drop back, and at the corner of Salisbury Road and Nathan Road he was 40 yards behind the leading couple, who were still going neck and neck.

Nearing the post Palmer, who was obviously the fresher of the two, put on a spurt and finished about ten yards in front of Jones-Rogers. Robinson, who made a gallant attempt to overtake the latter, did manage to pull up, but when Jones-Rogers crossed the line he held a lead of about 20 yards. Murphy occupied fourth place, while Private Jones came fifth.

The winner's time was 38 minutes 58 seconds, but cannot be compared with last year as the course had been somewhat altered.

The field finished in the following order:

L/Cpl. Palmer (Borderers), Pte. Jones-Rogers (Borderers), S.P.O. Robinson (H.M.S. Hermes), A.B. Murphy (H.M.S. Bridgewater), Pte. Jones (Borderers), L/Cpl. Andrews (Borderers), Pte. Lippiat (Borderers), Lieut. Smyth (H.M.S. Bridgewater), Pte. Ronan (Borderers), S. F. James (H.M.S. Medway), G. P. Bassett (R.A.F.) and Sergt. Hyde (Borderers) dead for 11th place, A.B. Shepherdson (H.M.S. Medway), A.B. Godfrey (H.M.S. Moth), Leading Seaman Taylor (H.M.S. Veteran), Stoker Pearce (H.M.S. Bridgewater), Stoker Shimmin (H.M.S. Bridgewater), Pte. Durbin (Borderers), A.B. McCourt (H.M.S. Bridgewater), Tel. Pownall (H.M.S. Medway), A.B. Beckett (H.M.S. Moth), Pte. Vosey (Borderers), and W. Jones (R.A.F.).

After the race, an adjournment was made to the St. Andrew's Church Hall where the prizes were given away by Mrs. W. Walton Rogers, wife of the Vicar.

In asking Mrs. Rogers to do so, Rev. W. W. Rogers said:

"This is the 11th annual Kowloon marathon organised by the Committee of the St. Andrew's Church Club. This year, we had 23 entries, compared with 36 last year, although only 27 started last year. We have had a very sporting race indeed. All the 23 entries turned up and all completed the course. This speaks very well indeed for the runners. The course has been altered a bit, and I think it is a little bit shorter. The approximate distance is 6 1/10 miles. The time registered by L/C. Palmer is 38 mins. 58 secs., but I cannot say how this compares with the times recorded in former years on account of the alteration in the course."

"L/C. Palmer won the race last year together with Pte. Jones-Rogers, who is now second, and I am glad they have not again put us in a dilemma by breaking the tape together as they did last year. Before asking Mrs. Rogers to present the prizes, I wish to thank the dons Mr. E. M. Dyer for the first prize, Mr. E. Abraham for the

Medway's 2nd Whaler (Capsized).	

JACK HOBBS TO GO TO AUSTRALIA.

To Represent London Newspaper.

London, Feb. 26.

Speculation as to whether Jack Hobbs, the famous England batsman, will be included in the English team which will visit Australia next Winter should be set at rest by the announcement that, although he will be going to Australia, it will not be in a playing capacity. As he is definitely not playing for England he has agreed to represent a London newspaper at the Test matches.

second and Mr. C. M. Manners for the third, and also Dr. H. D. Matthews, whose services, I am glad to say, have not been required to-day. Cap. R. D. Thomas intimated his intention of giving a fourth prize.

Mrs. Rogers was presented with a bouquet. The officials were:

Starter—Mr. J. P. Robinson.

Judges—Rev. W. W. Rogers, Mr. C. M. Manners and Captain R. D. Matthews.

Time-keepers—Mr. J. H. Hunt and Mr. J. W. Baldwin.

Host—Secretary—Mr. R. Wong.

Referee—Mr. E. Abraham for the

Daring Raid on Miami Club.

T. P. PERKINS WOUNDED.

Miami, Feb. 27.

A scene outvalling a sensational gangster film was enacted at the Embassy Club, one of the most fashionable night clubs here, early this morning, when armed and masked bandits attempted a hold-up, resulting in a shooting battle with the police, in which the ex-British amateur golf champion, T. P. Perkins, was wounded in the hip. One bandit was killed and two other bandits and two club employees were wounded.

Two plain-clothes policemen were eating in the kitchen when six bandits entered and covered the kitchen with their pistols and sawed off shot-guns, and marched them into the dining room filled with fashionable men and women dining and dancing. The leader of the bandits and two others proceeded towards the entrance and the remaining bandits tried to bar the doors between the kitchen and the dining room.

While their attention was momentarily distracted, the two policemen drew their pistols and shot the bandit leader dead. A battle between the police and the bandits followed.

Mr. Perkins, whom one of the bandits seized and held as a shield, was wounded by stray bullets.

Perkins's injury will probably prevent him from playing in the final of the Dixie Championship, of which he is the holder.

Perkins won the English amateur close championship in 1927, and won the British amateur championship in 1928 and was runner-up in the American amateur championship when Bobby Jones beat him 10 and 9. He has played three times for England against Scotland and once for Britain against America in the Walker Cup competition. Little more than a year ago he went to America to take up a professional appointment with the Fox Hills Golf Club, Staten Island, New York.

RENE LACOSTE MAY PLAY AGAIN.

Offers to Play for France in Davis Cup.

London, Feb. 20.

Rene Lacoste, the former Wimbledon champion, whose coolness and machine-like strokes have won the admiration of the tennis world, will probably return to the game in the near future for it is understood that he has offered to play for the French Davis Cup team.

Lacoste's last appearance was at Wimbledon in 1928 when he won the championship. Soon afterwards ill-health compelled him to give up tennis altogether. His presence in the French Davis Cup team this year may make all the difference to France in her efforts to retain the Cup.

Three years' complete absence from the game will take a good deal of catching up, but it is hoped that Lacoste will soon recover all his old mastery which established him as the world's greatest player.

BOROTRA LOSES HIS TITLE.

French Covered Courts Championship.

A great contest was seen in the final of the men's doubles in the French covered courts championship in Paris, in which the holders, Borotra and Gentien, were beaten by Marcel Bernard and Andre Merlin, a protege of Henri Cochet.

Borotra showed only flashes of his old brilliance, while his partner made the great mistake, on wood, of playing too much on the defensive. Bernard was the best player of the four.

Borotra, however, retained the singles by defeating Bernard in a brilliant, hard-fought match.

THE KWONG KW

THE FIGHT FOR THE ASHES

COMING ENGLISH TOUR

(By "Not Out.")

Discussing the visit which the English cricketers will pay to Australia at the end of this year Not Out, in The Sydney Referee, says:

The position to-day is changed. England has been re-building since disappointment over the Oval defeat softened. Her selectors have been appointed for a longer term than one year, to keep intact their constructive policy. P. F. Warner, than whom there is no keener cricketing brain among living men, has been the mainspring in this. He now says it is 2 to 1 on England for the coming Tests. This is, no doubt, meant for home consumption and propaganda, to re-create confidence shattered a little while ago. If P.F.W. had said the odds were a shade favourable to England it might more truly reflect his views. In any case it indicates the lines along which he is thinking.

Are the odds on England at this stage? Irrespective of the fact that we know the personnel of neither team the chances of England cannot be better than Australia's, with the luck of the weather equal. At this stage no series for the Ashes has looked more interesting nor more likely to produce a succession of extraordinarily keen and close fights. It looks as though the bat will have the best of the contest with the ball and that this will apply to both sides.

First Six Batsmen.

It is being contended in London that England's first six batsmen are better than Australia's first six. This is a matter of opinion. If Archie Jackson comes back to health and form fit to play in the Tests one holds that Australia's first six will be better than England's. Even if Archie does not come back in time Australia will probably be still better collectively in her first six. Let us put the names opposite to one another and make a comparison man for man and collectively:

AUSTRALIA ENGLAND

Woodfull	Sutcliffe
Ponsford	Jardine
Tonsford	Jardine
Bradman	Hammond
Kippax	Duleepsinhji
Jackson	Pataudi
McCabe	Leyland

In giving these as the respective first six batsmen there is more conjecture. Jackson may be replaced by K. E. Rigg or V. Y. Richardson or J. Fingleton or someone else for Australia, and the Nawab of Pataudi may not be in the English team, which, after all, may once again include J. B. Hobbs. But even changes of this character, if based on first-class form of the chosen men, may not change the relative values.

Woodfull has shown magnificent quality in rising to the occasion as opening batsman, and, on the whole, looks as even better batsman may be when the Englishmen were last out here.

Then Don Bradman! In face of what he has done in Test cricket, and continues to do, it is possible that he will eclipse even himself if we have a fine weather season. He is the one man in the entire history of cricket whose value to a side we cannot assess. That he is to play for Australia and not against us, is a very happy thought. The fate of the Ashes may even be determined by this amazing young cricketer. But if he happens to fall cheaply to the English bowlers it is on the cards that others will rise to it better even than usual, when they feel the acid test on them.

Tail-End Batsmen.

Now we come to consider the last five batsmen on each side. Here Australia has an advantage, if, as we expect, the two sets of players be something like the following:

ENGLAND AUSTRALIA

Ames	Oldfield
Tate	O'Reilly
Larwood	Wall, or Nash
Voce	Ironmonger
Peebles	Grimmett

This is of course not necessarily the teams face one another.

RUGBY FORWARDS
ATTACKED.Methods Require to Be
Reconstructed.

Mr. W. T. Pearce, the President of the Rugby Union, pleaded for the reconstruction of the methods of forward play at the dinner of the Old Cranleighans R.F.C. He emphasised the importance of the spirit of battle in Rugby football, which should, within obvious limits, be given free rein on the field and succeeded by amity and comradeship after the match.

Possibly a reversal to the first-up first-down methods, which produced an all-round forward, might revive the lost art of the wheel, in his opinion one of the best features of the game. There should thus be a place, too, for those lacking in subtlety as well as for the subtle.

INTERESTING GOLF
MATCH.Hanrahan Against
Bradman.

Sydney, Feb. 19. Allan Malden, professional at the Victorian Golf Club, and brother of Stewart Malden—Bobby Jones's world-famous mentor—received a big surprise last week. He took Don Bradman for a round of golf at Victoria, and, in Allan's own words, "Don played 'absolutely scratch golf'."

Malden thinks it a pity that Don should waste his Saturday afternoons running two or three hundred times between wickets.

"He shows such decided skill that I'm certain, with practice, he would be a first-fighter," says the genial pro.

Having played also with Strudwick, Woolley, Kinneir, and Hammond, Allan would like to see a golf match between Bradman and the last-named. Hammond is a fine golfer, and one of the longest drivers Australia has seen.

What a gallery such a game would fetch.

TENNIS PROGRAMME.

TO-DAY.

Open Singles.

Stand Court:—M. W. Lo v J. W. Leonard.

A. L. Sullivan or D. B. Evans v Ho Ka-lau.

W. C. Hung v Ng Sze-cheong.

Handicap Singles "A".

A. C. Bowker v R. M. Henderson.

J. Barton v C. C. Stark.

Handicap Singles "B".

G. Puncheon v C. Anderson.

H. McBride v Williams.

Handicap Mixed Doubles.

Col. and Mrs. Lecky v Palmer and Miss Stevenson.

Barton and Miss Halifax v R. Hancock and Miss Hancock.

TO-MORROW.

Open Doubles.

Stand Court:—Akiyama and Honda v Ho Ka-lau and Yew Man-kit.

Remedios and Ribeiro v Lee and Luk.

Barros and Remedios v Silva and Sousa.

Club Championship.

Holmes or Green v R. M. Henderson.

F. A. Redmond v L. Forster.

Handicap Singles "A".

Nash v Valentine.

Raworth or Forster v Sewell.

Handicap Singles "B".

Todd v Nigel.

Ferguson v Cleland.

Handicap Doubles.

Penn and Hill v Stubb and Scull.

THURSDAY.

Open Singles.

Stand Court:—S. A. Rumjahn or Yew Man-kit v Y. Hachiuma or J. A. E. Cassumbhoy.

Club Championship.

D. M. MacDougal v Y. V. Segalen.

Green or Raworth v Henderson.

Handicap Singles "A".

Railton v T. J. Price.

Handicap Singles "B".

Lawson v Stock or Beck.

Handicap Doubles.

Nigel and Watson v Childs and Brooks.

Handicap Mixed Doubles.

Mr. and Mrs. Lawson v Gordon and Miss Thomas.

Mr. and Mrs. Wood v Grimble and Miss Hancock.

MACAO JOCKEY
CLUB.Programme for Second
Extra Meeting.

The Second Extra Race Meeting of the Macao Jockey Club will take place on Sunday, April 3, when the following races will be decided:

1.—The Siberian Stakes.—For

Subscription ponies of any club

of any season, whether starters or not,

that have not won a race this year.

Six lbs. less than weight for inches,

i.e. 13 hands=140 lb., and so on.

To be ridden by Jockeys who have

not won ten races anywhere at any

time. Jockeys 2 lb. Penalty for

each race won. No Whips or Spurs

allowed. Penalties Accumulative.

A Cup will be presented to the Win-

ning Jockey. Winner \$200. Second

\$150. Third \$75. Entrance \$5.

Six Furlongs.

2.—The Spring Handicap.—For

China Ponies that have started at

least twice this year and have not

won a race this year. Winner \$350.

Second \$150. Third \$75. En-

trance \$5. One Mile.

3.—The Easter Stakes.—For

China Ponies, Griffins of the Hong

Kong Jockey Club of this Season,

whether starters or not. Weight

for inches as per scale. Non-

winning starters allowed 7 lb.

Winners of One race 5 lb. penalty,

or two races 7 lb. penalty; or more

than Two races barred. Jockey

allowance. Allowances accumula-

tive. Winner \$450. Second \$200.

Third \$150. Entrance \$5. One and

a Quarter Miles.

4.—The Green Island Handicap.—

For China Ponies classified by the

Hong Kong Jockey Club in 1932 as

"D" Class ponies and Macao Sub-

scription Ponies. Winner \$350.

Second \$150. Third \$75. Entrance

\$5. One Mile.

5.—The St. Kilda Handicap.—For

Australian Ponies, "B" Class. Win-

ner \$400. Second \$200. Third \$100.

Entrance \$5. Six Furlongs.

6.—The Heungshun Stakes.—For

China Ponies classified by the Hong

Kong Jockey Club in 1932 as "E"

Class and Macao Subscription

Ponies. Weight for inches as per

scale. Winners this year 7 lb.

placed ponies 3 lb. penalty. Jockey

allowance. Winner \$360.

Second \$150. Third \$75. Entrance

\$5. Once Round.

7.—The Macao Stakes.—For

China Ponies, Griffins of the Hong

Kong Jockey Club of this Season,

whether starters or not, that have

not won a race. Weight for

inches as per scale. Jockey allow-

ance. Winner \$350. Second \$200.

Third \$100. Entrance \$5. One Mile.

Entries will close on Thursday at

5 p.m.

FETTES DEFEAT
LORETO.Interesting Scottish
Schools Game.

London, Feb. 23.

Nearly 2,000 spectators witnessed

the game between Fettes and Loreto

at Fettes when the home team

won by two goals and two tries (18

points) to one dropped goal and a

try (7 points).

It proved an interesting match.

The visitors started off very well

Capitalism and the Alternative.

The amount and diversity of writing and specifying of late years on the subject of Capitalism may well make the plain man wonder what all this bother is about, and what is Capitalism anyhow, and how does it affect him in his life and lawful occasions?

Now all graduates of the Science of Exact Thinking, of which science journalists are naturally the Masters and Protagonists, pine always and ever for a definition. So in the beginning we ask ourselves—"What then is Capitalism?

Turning automatically to our old friend "Webster" we got something all, who pay their workers a "mere pittance," and expect them to slave for eight hours every slaving day. Capitalism and Capitalists are the enemies of mankind, and unless we can smash Capitalism civilisation as we know it will cease to function, and the world return to Chaos.

There is, you will notice, a slight divergence of opinion in these two definitions; but there they are, take your choice! On the one end of the rope you have Horne, Runciman, Norman, Geddes; on the other end Lansbury, Maxton, 'Davy' Kirkwood, Neil McLean; (with Snowden watching the mark on the rope) all stout men and true and pulling their weight according to their lights, and who will win the tug-of-war lies as yet on the knees of the Gods.

One thing you may have noticed is that not one of the reformers, humanitarians, pseudo-economists, faddists, doctrinaires that dangle the millennium before our dazzled eyes will come down out of their clouds of rhetoric and give a cut-and-dried system to take the place of Capitalism. The only example to-day of a country not on a capitalist basis is Soviet Russia, and she seems doing her best to get back to Capitalism as soon as may be. For indeed their position was forced on them. When the Sovereign People slew the Tsar and chased the aristocracy, (who in Russia were the Capitalists) Capital and Capitalism faded away in a night.

For the one thing we do know about Capitalism for truth to-day is that it is an intangible entity, its working only known by its results, not understood of the people, seen only in a glass darkly even by its votaries. Of Capital itself also this much at least we have lately learned. That it is neither gold nor silver, nor jewels of price—but only Credit. That country, great or small, whose people are honest, hard-working, amicable, and stout of

heart will always have credit, and credit means capital. Not all the gold in the world's banks will save a country, but for a time, unless that country maintains her credit in the world's markets. To-day Great Britain's gold hoard amounts to about thirty shillings per head of her population, but her credit is good, even improving, and the clouds that obscured her financial sun seem to be rolling away.

One point made by both the Protagonists and the Antagonists of Capitalism seems to us in error—that Capitalism is a modern development. Surely when the cave man barged into history to proclaim in throaty gutturals that anyone who ventured into his particular hole in the rocks without being invited would get a club behind the ear he originated that sacred institution known as "vested interests," and when he decorated his wooden persuader with ragged shells from the sea-shore and so increased the efficiency of his machine he was the fore-runner of the great inventors of later times, of Watt, and Kelvin, and Edison, and other present-day idols of Capitalism.

So until the theorists come down to brass-tacks, and show us some system definite and better fitted to our needs than Capitalism it seems to us that we will just have to worry along as we are. That we in Hong Kong, which from its geographical position may be likened to spear-head of capitalism thrust into the heart of Asia, will just have to stick a few extra shells on our club, wander into the local robber's cave in hope to come out with a meaty bone, but if out of luck at least to emerge with our skulls intact, and our club still remaining to us for further endeavour.

News in Brief.

In an alleged attempt to commit suicide Wong Ya-ping, a native of Shantung, jumped into the harbour from the Kennedy Town Praya, near Sand Street. He was rescued and taken to the hospital.

The total output of the Kailan Mining Administration for the week ending March 5, 1932 amounted to 96,483 metric tons, and the sales during the period to 83,382 metric tons.

Suffering from a fractured skull, Au Tai, (32), a seaman on board a Kowloon Godown lighter, was admitted to the Kowloon Hospital, last night, in an unconscious and dying condition.

In order to meet the general request of patrons, the management of the King's Theatre have decided to screen, for one day only, the British picture "Tilly of Bloomsbury." It is being shown tomorrow, don't miss it.

Thanks to the enterprise of the management of the King's Theatre, we are to have a British Musical picture. This film, "Sunshine Susie," which compares favourably with the Hollywood products, will start its run on April 3.

Whilst at work in the Hong Kong Hotel Garage, Stubbs Road, yesterday, an employee named Lau Kong, (39), crushed two fingers when an iron wheel fell on him. He was taken to the Government Civil Hospital.

Five Chinese men, three of whom were armed with daggers, gained entrance to 20, Hillier Street yesterday afternoon, and after overpowering the inmates, decamped with a haul of jewellery, money, and clothing.

We are informed by Messrs. Goek & Co. that a cable just received from Societe Internationale de Placements, Basle, stated that yesterday's official quotation for one sub-unit of the International Investment Deposit Certificate was \$2,180, excluding dividends accrued.

Personal Page.

The forthcoming wedding is announced of Mr. Luis Edwardo de Sousa, No. 75a, British Concession, Shamian, Canton, to Miss Leonor Marla Xavier, No. 26, Granville Road, Kowloon.

We regret to record that the Chief Justice (Sir Joseph H. Kemp, K.C.) is indisposed with a touch of influenza. In the circumstances the family dispute case, at present before the Court, is adjourned until Sir Joseph's return. It is possible that with this unfortunate interruption the Court will have to sit during the Easter vacation to cope with the work on hand.

Lecture.

BEAUTIFYING THE BODY

MARVELS OF COSMETIC SURGERY.

found among the Indians who built up noses and ears cut off by their enemies, using flesh from the forehead, while the cheeks provided material for grafting new lips. Hippocrates repaired noses centuries before the birth of Christ, while Celsus wrote pamphlets on facial surgery in the early years of the Christian era. In the 15th century it is recorded that a Sicilian named Branca was performing such operations, getting the new flesh from the arms. Some years later, the science was given a definite set back by the Church who preached the doctrine of the mortification of the body. Even to-day there is still a narrow-minded class which condemns those seekers after the beautiful, who in this laudable ambition are fulfilling the most deeply rooted instincts of the reasoning being.

The discovery of local anaesthesia and asepsis led to a revival of the practice of cosmetic surgery. America eagerly adopted it, sponsored as it was by Madame Noel of Paris whom Shanghai will soon have the pleasure of meeting. It then spread to Europe generally, but it has remained for Germany to give it official recognition. Under the Health Insurance Scheme of that enlightened country, central bureaux have been set up where advice is given to the working classes on this matter, to the great benefit of a vast army of female wage earners. In 1925 they numbered 11½ millions, the larger proportion being between the ages of 20 and 40.

Aesthetic surgery need have no terror for the uninitiated. A local anaesthetic is employed for such minor operations as the removal of wrinkles, and attendance at a hospital is not necessary. One can go about one's daily occupation immediately after treatment and no one else is any the wiser.

Proof by Photograph.

Dr. Engel then showed by photographs how effectively the human body may be improved—a matter of interest to men as well as to women. Crow's feet, pouches under the eyes, and those devastating lines which run from nose to chin disappear like magic and only an infinitesimal scar remains well hidden by the hair above the ear or on the forehead. Nor need people fear that the face loses its character. Lines caused by illness, severe emotion or climatic conditions may give a wrong estimate of a disposition and their removal is an advantage. Other photographs showed how aesthetic surgery can dispose of double chins, big hips, bulging ankles, fat arms and sagging figures.

At the conclusion of the meeting the audience gave Dr. Engel a hearty round of applause which left no doubt as to their appreciation of his interesting and instructive address.

OBITUARY.

Capt. A. F. B. Howard
Dies at Sea.

ON THE WAY HOME.

The death from heart failure occurred on board the P. & O. liner Carthage, on Sunday, of Captain A. F. B. Howard, M.C., assistant auditor of the Hong Kong Government. He was on his way home on leave.

Capt. Howard, who was 39 years of age at the time of his death, was educated at Wellington, and at the outbreak of the Great War in 1914 was British Vice-Consul at Danzig. He served in France and Italy with the Durham LI, and received the Military Cross for distinguished service.

After the war he served in the Colonial Audit Department, London. In 1919 he became Assistant Auditor in Nigeria, and in 1926 Auditor in Gambia. He came to Hong Kong in 1928 as Second Assistant Auditor, and had acted as Auditor and First Assistant Auditor.

He was a keen Mason and member of the Perseverance and University Lodges, Hong Kong.

to public service having been a member of every Chinese committee formed during the time

Ten Years Ago.

(From the "China Mail" of March 22, 1922.)

To-day's dollar is worth 2/5/16.

Interviewed by a China Mail representative this morning, the Hon. Mr. Lau Chu-pak, senior Chinese member of the Legislative Council, said that he had decided to resign his seat on the Council, and had already sent an intimation to the Government to that effect. He was now only "awaiting orders." His reason for this decision was that he had already given 30 years of his life

HUMANITY'S GREATEST NEED

LECTURE BY A CHRISTIAN SCIENTIST.

The Great Burden of Disease.

Mr. Albert F. Gilmore, C.S.B., of Boston, Massachusetts, a member of The Christian Science Board of Lectureship, delivered a lecture entitled "Christian Science: Humanity's Great Need" last evening, under the auspices of First Church of Christ, Scientist, Hong Kong in the Roof Garden of the Hong Kong Hotel.

The lecturer was introduced by Mr. William H. Adler, who said: Friends: On behalf of First Church of Christ, Scientist, Hong Kong, you are welcomed here to listen to a lecture on Christian Science, which meets the needs of all mankind.

In the Christian Science textbook: "Science and Health with Key to the Scriptures," the Discoverer and Founder of Christian Science, Mary Baker Eddy writes: "Divine Love always has met and always will meet every human need."

One of the names for God in the Bible and in Christian Science is Love—Infinite Love infinitely tender and compassionate, always giving to and caring for His own. During the past ten years, five of which have been spent in the Far East, Christian Science has met my needs in all respects.

Our lecturer, this evening, has chosen for his subject, "Christian Science: Humanity's great need"—I have the pleasure of introducing to you a member of the Board of Lectureship of The Mother Church, Mr. Albert F. Gilmore, of Boston, Massachusetts:

THE LECTURE.

The lecturer spoke substantially as follows:—

If you were asked to name mankind's greatest need you might reply, "To be relieved of sickness, to be relieved of the burden of disease which from the very beginnings of the race has weighed humanity down; to be made whole, in order to enjoy the pleasures, comforts, and activities of a normal life." None can gainsay that ill health has been one of the most grievous burdens mortals have had to bear, and from the earliest history, to find relief from this encumbrance has occupied the earnest attention of untold thousands.

Sickness both entails great suffering upon the afflicted, and also deprives him of the fullness and joys of life to which man is entitled. Often it plunges him into poverty and squalor. It does even more than this; it imposes upon society a burden, the extent of which is quite incalculable. The Department of Commerce of the United States Government recently stated, as reported in the Press, that thirty-six million wage-earners in America lose two hundred and fifty million days from work each year as a result of illness; and that for the same reason twenty-four million school children lose each year seventy million days from school. But these statements relate only to the comparatively healthy, the adults who work and the children who attend school. What of the incapacitated, those who from various forms of disability are dependent upon others for support and care?

Toll of Disease.

A prominent health insurance company has stated that the loss of productive energy from disease is at least forty per cent. of the producing power of the race. Now, this loss of time and productive energy, grievous as it is, is but one phase of the calamity. The vast economic problem imposed upon society, the necessity of supporting and caring for the sick and suffering, must for the greater part be borne by those entirely innocent of any responsibility for its occasion. From one standpoint, this burden is wholly self-imposed. It is the result of the sufferer's wrong mental attitude, his belief in man as a material personality, to which error can attach itself; to his own mental misdeeds, as it were; to an act of will and consent which perhaps ignorantly, but none the less surely, imposes upon himself a condition of disability and upon society the resultant burden which it has to bear.

From an economic standpoint

from the roof of the house into his healing presence? What a priceless boon did the Nazarene bring to suffering humanity! How their hearts must have leaped with the joy of expectancy as the great truth dawned upon benighted consciousness, that it was the Father's good pleasure to give them the kingdom, the kingdom wherein sin and suffering never enter!

A Dream Shattered.

It is little wonder that they awakened from their illusion, their ancient dream, with hearts aglow with love for the Master, their Saviour and Messiah! No event in all history is so fraught with glorious consequences to humanity as the advent of the man of Nazareth, with his blessed message of God's perfect love for all His children.

It is sad commentary upon the instability of mortals, that Jesus' message so soon lost its significance; that in so short a time the Christ healing was buried in its graveclothes of formalism and dogma. In less than three centuries the wondrous light waned, flickered, and went out, to be rediscovered and made available again to meet poor humanity's needs only when sixteen centuries had passed. How appropriately have the centuries between been termed the dark ages—dark, indeed, when the glorious light of Love, reflected through the words and works of Christ Jesus, ceased to illuminate human consciousness! *

Prophecies Fulfilled.

But the prophecies and expectations of the Founder of Christian Science have been fulfilled in the revelation of Mary Baker Eddy! Did not Jesus declare in unequivocal terms: "And these signs shall follow them that believe; in my name shall they cast out devils; they shall speak with new tongues; they shall take up serpents; and if they drink any deadly thing, it shall not hurt them; they shall lay hands on the sick, and they shall recover." Did he not command his followers, not for their time alone, but for all time, to "heal the sick," to "cleanse the leper," and to "raise the dead?" Did he not also utter the precious prophecy: "Greater works than these shall ye do; because I go unto my Father?"

In Christian Science these predictions, these promises of the Master, are to-day being fulfilled, wonderfully fulfilled in the demonstration of spiritual power over the claims of evil. Again, throughout the civilised portions of earth, the sick are being healed without material medicine; the sorrowing are comforted with the balm of perfect Love; the blind made to see, the lame to walk, the deaf to hear, and to the poor the Gospel of God's abundance is being effectually preached. Again the Christ, Truth, the most potent and the most practical of all healing agencies, is being demonstrated as the one sure remedy for all human ills.

Christian Science the Perfect Remedy.

With the discovery of Christian Science, sixty-five years ago, the method of spiritual healing practised so successfully by Christ Jesus was restored, later was elucidated by Mrs. Eddy and is to-day demonstrating the presence of God and the power of His Christ to destroy every type of discord, every form of error, every phase of disease, misery, want, unhappiness, which restricts and harasses human experience. Through its healing ministry, Christ, Truth, is again meeting mankind's every need. Do you doubt this? Then what of the testimonies, thousands in number, given in the approximately twenty-five hundred Christian Science churches every Wednesday evening, and the other thousands published in the Christian Science periodicals? Do you doubt their authenticity? Who knows better than the healed themselves of the freedom from the bondage of sickness which follows when the light of Truth illuminates consciousness?

If proof of this healing be required from medical authority, it may be asserted that many physicians have acknowledged the successful healing ministry of Christian Science, and have given public utterance thereto. To cite a single case: A well-known member of the staff of the Medical College at Harvard University stated publicly that he was convinced that Christian Science heals both organic and functional diseases. Others, equally prominent, have made similar statements. It may be asserted, without the slightest fear of contradiction, that beyond possibility of refutation, the case is proved that through spiritual power alone Christian Science heals disease in its every form.

Method of Spiritual Healing.

The fact of spiritual healing established, let us enquire as to its method. It is often mistakenly

held that Christian Science healing is a mysterious process; that the technique of Christian Science practice is not easy to understand. And yet a little child will grasp its Principle and rule so completely as to heal the sick, sometimes, as it were, out of hand.

Three factors are fundamental in spiritual healing; namely, faith, understanding, and righteous prayer; faith in God, that He is the ever present and omnipotent Father-Mother, infinite Love; understanding of the divine nature; knowledge of the method through prayer of invoking His aid, always available to meet our needs. These are made so plain in the Christian Science textbook, that through prayerful study all may acquire the method. Mrs. Eddy's cogent injunction, "At tempt nothing without God's help" (The First Church of Christ, Scientist, and Miscellany, p. 197), would be quite innocuous, had she not shown the way, the perfect way, whereby God's aid may be invoked. "Study thoroughly the letter and imbibe the spirit" (Science and Health, p. 495) is her instruction as to the best means to insure progress in Christian Science.

Love For Humanity.

The letter of Christian Science is knowledge of divine Principle, of its law, and of the practice of that understanding; it is knowledge of the truth and how to declare it; how to affirm God's allness and man's perfection; how to deny falsehood to error, to every false material belief; how to know its nothingness. The spirit of Christian Science is the love for humanity which loves one's neighbour as one's self; the love which reflects the divine Love; the love which knows only man's present and eternal perfection; the love which enabled Jesus to endure the cross and to rise above the persecutions of his enemies; the love wherewith he loved us; loves all who name the name of Christ.

Now, let us be assured that healing in Christian Science is not accomplished through holding to disease as something, as an entity, to be destroyed. Disease is healed through knowing its nothingness, that it has no reality, no presence and no power apart from false belief.

Disease is a false belief and nothing else. If you say, But what of the patient, the sufferer? Is there not a sick man to be healed? Christian Science answers unequivocally and emphatically, No! There is in reality none other than the man God created, who never is sick and is never in need of healing. This understanding gained and firmly held to, inevitably and invariably destroys the false belief that man suffers from any type of disease.

The Method of Spiritual Healing. A Christian Science practitioner does not attempt primarily to heal a sick body. Sick thoughts alone are to be healed by changing belief in sickness to a sense of health; belief in error to a better belief, falsity for truth. Belief in sickness is changed to a sense of health when it is learned that man, the real man, God's likeness, is both spiritual and perfect, now and for ever. Is this so difficult? Why should this be more difficult of accomplishment than the supplanting of any falsity with truth? You may say, "Because sickness is so personal, seems so real." Yes! It seems real because we hold to a false sense of man. Is man flesh and blood, a mortal? Or is man the son of God, His perfect likeness, wholly spiritual?

Our necessity is to lay hold of the fundamental fact of man's present and eternal perfection, never yielding to the temptation to believe in man as matter. "Lead us not into temptation," is a very important petition in the Lord's Prayer. Temptation is too often our undoing. The humorist recognised this when he declared that he could resist everything but temptation. Now let us fortify ourselves against the tempter, our archenemy, personal sense, which declares man to be mortal. In this, false belief about man, this personal sense of man, lies the answer to the plaint so often voiced by the sick, "Why, oh, why, have I not been healed?" Always and invariably, the answer is, "Because of your belief, your terribly mistaken belief, that man is a mortal."

Is Healing Difficult?

Is healing, then, so difficult? Hear Mrs. Eddy's words, "Become conscious for a single moment that Life and intelligence are purely spiritual—neither in nor of matter—and the body will then utter no complaint." And she adds, "If, according to the mental cause of disease in so-called psychotherapy and its allied methods, it should be recalled that Mrs. Eddy makes it very clear that the mortal or carnal mind, and material body are one, and that, complainant—and the adds, "If, according to the mental treatment suffering from a belief in sickness, which is based upon this so-called mind is only less material than the manipulation and treatment of the subjective state of that false sense."

HUMANITY'S GREATEST NEED

(Continued from Page 7.)

of mind, the human body. There, from another cause. Not difficult, is it? It should not be difficult to replace error with the truth about anything, even the false concept of cause with the truth that God is the only cause and man the perfect effect. Healing in Christian Science, then, is wholly a mental process. It is the correction of a falsehood by application of the truth.

Now, we learn in Christian Science that since there is but one cause, God, there is no effect apart from His creation. God and His perfect universe, including man, constitute all reality. There is therefore in reality no other cause than God, and no other effect than His universe of spiritual ideas, including perfect man.

Universe of Materiality.

But in the realm of belief there seems to be a universe of materiality, including a mortal, called man, albeit this universe and this man have no existence in reality. That is, God never caused or made either. God is the only real cause, but as there seems to be another universe than His, so there appears to be another cause, the so-called mortal mind, claiming falsely, all the prerogatives of divine Mind, even to that of creator. Both this so-called mind and its objectification, termed a mortal, are without entity or being. However, as mortals, it is necessary for us to deal with these false beliefs, to know their unreality, their nothingness.

"Error," that is, mortal mind, "made its man mortal," Mrs. Eddy assures us, "and this mortal was the image and likeness of evil; not of good" (Retrospection and Introspection, p. 67). Therefore, in healing sickness we are dealing with a false concept of man, a counterfeit, which has no existence apart from illusion, the imaginary, the delusive. This concept, termed a mortal, is false in both its cause and seeming effect.

Supplant a Falsehood.

What, then, could be more logical, more reasonable, than to supplant the falsehood regarding cause and effect with the truth about it? In all our relationships we cease to accept a falsehood when the truth appears. How, then, does causation relate to the healing of the sick? By knowing that sickness, whatever its form or claim, is without a cause; is, in fact, the erroneous effect of a false sense, to be false destroyed by replacing falsity with truth; that is, by changing belief in a mortal mind able to cause disease, through the understanding that God, infinite good, is the only cause. There is no effect

Simon was entertaining Jesus at dinner. What had caused this great change in her mentality? Jesus' pure consciousness of spiritual being. Sinful thoughts could not stand in the presence of his spiritual sense, purified and sanctified through his unprecedented realization of God's illness and of man's perfection. And he, recognizing the woman's healed state, assured her, "Thy sins are forgiven. Thy faith hath saved thee; go in peace." This woman, it is generally believed, was Mary Magdalene, who, healed for her sinful ways, became so devout a disciple of the Master that she even followed him to Calvary and the cross.

Belief in Sin Punished.

Sinful beliefs cannot persist in the presence of Truth, and when thought is sufficiently spiritualized so that the nothingness of all fleshliness is seen, sin, the concomitant of carnality, disappears. Spiritual healing so completely destroys sinful beliefs and desires that Mrs. Eddy could write as a tenet of Christian Science these words (Science and Health, p. 497): "We acknowledge God's forgiveness of sin in the destruction of sin and the spiritual understanding that casts out evil as unreal. But the belief in sin is punished so long as the belief lasts." To destroy all belief of pleasure in sinful indulgence is the one method of healing sin.

It is belief, false belief, that causes suffering from sin as well as from disease; in fact, the two are often allied; and the remedy is the same. Christ, Truth, the truth about God and man. There is however, this difference in the healing process: the sufferer from sickness is anxious to be relieved of his suffering; he desires above all else to be free. The sinner, believing perhaps that sin confers pleasure, is less willing to change his erroneous belief. He would like to continue his sinful ways without penalty. But when he learns of the utter unreality of material sense, even though it seems pleasurable, he is more willing to be freed from his thrall. False appetites, such as desire for tobacco and strong drink, are among the false beliefs thought to be pleasurable, until consciousness, in the process of purification, awakens to the recognition of their utter nothingness.

Unnatural Appetite.

The cigarette habit, so generally prevalent to-day, will cease to hold men and women in bondage when its true nature is seen. Its seeming pleasure is but the gratification of an appetite wholly unnatural. It is as transitory as a passing cloud. Social drinking is of the same nature. Indulgence of these appetites only sinks one deeper into the miasma of materiality. And every false appetite cherished and indulged is a wrong step to be retraced, perhaps through travail and suffering. When freedom from these enslaving beliefs is once gained, when once their utter nothingness is seen, their former victims rejoice exceedingly in a new-found liberty. We little enjoy the thought that we have been held in bondage to falsity,—that an illusion has held us in its toils. Once the nature of a false appetite is recognized, healing (Continued on Page 11.)

THE KWONG HIP LUNG CO. LTD.

ENGINEERS and SHIPBUILDERS, BOILER MAKERS, BRASS and IRON FOUNDERS. All work done in this establishment is guaranteed. We have over thirty years' experience. We own two Slipways and can accommodate any craft of 200 feet long.

Town Office: 64, Connaught Road Central, Hong Kong. Tel. 20459. Shipyard: Sham-ku-po, Kowloon, Hong Kong. Kowloon Tel. 57089. Estimated furnished on application

HUMANITY'S GREATEST NEED

(Continued from Page 10.)

is at hand. The uncovering of the has no other life than God; has no unreality of the illusion leads to material life to be yielded up.

The Future State.

The freedom which mortals commonly seek is an harmonious sense translated? Through gaining this of physical existence, comfort in the truth, laying hold of this supreme flesh. It is to this end that human life is ordered. But the thoughtful, sooner or later, turn their attention to the great question, What next? Becoming convinced that God as Life, that resurrected him, best the material sense of life is but transient, that as it had a beginning, so it also must have an end, they seek a solution to the problem. Whither do mortals proceed from this plane of thought?

As we have seen, the healing of human consciousness which results from the application of Christ, Truth, is a process of transformation, the changing of false material beliefs for spiritual truth, the truth about God and man. This transforming Christ changes consciousness from a material to a spiritual basis. Belief is changed to a better belief when thought rises higher through spiritualization. Mrs. Eddy perfectly elucidates the problem on page 573 of the Christian Science textbook. "The testimony of Holy Writ," she declares, "sustains the fact in Science, that the heavens and earth to one human consciousness, that consciousness which God bestows, are spiritual; while to another, the unillumined human mind, the vision is material."

And there follows the assurance that what we term matter and spirit represent "states and stages of consciousness." Which state of consciousness are we claiming? Are we holding to matter or spirit as reality? In our concept of man spiritual or material? The answer to these questions determine whether we are in the heaven of Spirit, or the hell of materiality. Both are states of consciousness.

"The unillumined human mind entertains, manifestly, a false sense of creation; it conceives the universe, including man, to be wholly material; it believes that existence is material, that life enters matter, is sustained by it, and passes out of a material body through what is termed death. Now, this false concept is supplanted by the fact that Life is God, eternal, infinite, unchanging; that man, as the expression and reflection of that Life, lives for ever; that God's man knows no material birth, maturity, or decay, but exists forever at the standpoint of perfection, at manhood's eternal noon. Here are different states of consciousness, the one wholly material, the other wholly spiritual. Our work as mortals is to exchange the former for the latter, the so-called material consciousness for the spiritual, the false for the true. Thus do we gain the kingdom of heaven and eternal life.

The Kingdom of Heaven.

Now the kingdom of heaven is not a place. Did not Christ Jesus settle that for all time? Interrogated by the Pharisees as to the time when the kingdom of God should come, he told these persistent inquirers that this state of consciousness comes not from observation, "neither shall they say, 'Lo here or lo there; for behold, the kingdom of God is within you.' Within you! That is, in consciousness—in the spiritual consciousness, man's true consciousness, which is cognizant only of spiritual truth, of the things of God."

We, too, may inquire, as did the Pharisees, "Where is this state of consciousness, termed the kingdom of heaven, to be found?" The answer still must be, "Within you." In you, the real man; as the reflection and expression of divine Mind; not in place, neither here nor there, not in time, but in consciousness. When thought is divested of false material beliefs, consciousness is cognizant only of spiritual truth, of the divinely good. This is the kingdom of heaven, not to be taken by violence, but the transforming of thought from a material to a spiritual basis. Can this end, think you, be accomplished by death? Such experiences could scarcely fail to inspire a sense of heartfelt love and veneration for her who made them possible. To be sure, the Christ, Truth, has always existed, ready and at hand to heal humanity of all its woes, but a revelator was necessary to make it again available to meet the needs of mankind. And God prepared not an enemy, and the Scriptures, Mary Baker Eddy for this blessed inform us that death is an enemy ministry. Why was she thus blessed the last enemy to be overcome? Because through much travail! But, to be overcome, not submitted and tribulation she had been mortal. How is this to be accomplished? Tilly and spiritually, that is, the ed! How is death, the last enemy, holy purpose? How properly could to be overcome? By knowing that she have uttered the words which God is eternal life, and that man kindles out into the mouth of the

explorer, who, after much hardship had discovered a virgin empire: "Anybody might have heard it, But God's message came to me."

Goal of All Mortals.

And so the heart of every true Christian Scientist goes out to Mrs. Eddy in love and gratitude, in joy and thanksgiving, for her revelation of the Christ, which is pointing the way, the only way, to complete salvation. The ultimate of this transforming experience is the goal of all mortals, heavenly harmony, and eternal life.

If there are those in this audience who are holding to the thought of man as sick and sinful, as in sorrow or in want, or who are unhappy through indulging the luxury of self-pity, let them know that healing is at hand, full and complete. Christ, Truth, Love's perfect remedy, is available here and now to destroy every discordant belief. As we rise in the strength of Spirit to deny evil's every claim, we are set free. God's man was never in bondage. As we cease to entertain sick thoughts, as we cease to hate, to envy, to resent, to covet, the light of Love shines in consciousness.

ness and we find ourselves healed, harmonious and happy.

Let us never doubt that God has already endowed His beloved with all blessings, that the real man, God's likeness is eternally perfect. This conviction held to will bring man's perfection and blessedness into our present experience. Let us cease to limit God's beneficence. Rather let us accustom ourselves to the expectation that all good will enter our experience immediately. In these ways our concept of man is both purified and glorified; and we abide in the certain sense of God's loving presence.

HEARTS OF BRASS NOW PERFECTED.

New Mechanical Device and How It Works.

BRITISH SCIENTIST'S FEAT.

A British scientist named Gibbs has perfected a mechanical heart which maintains blood circulation in animals after the real heart has been removed, according to Dr. Paul J. Hanzlik, head of the pharmacology department of Stanford University, California.

The mechanical heart is made of brass, and with it dogs, cats, rabbits, and other such animals live for several hours under an anaesthetic.

Its value is that it enables students and physicians to trace the flow of blood through an animal's body and to study the effects of various drugs and dyes on the blood.

First of all we must learn something about the wireless waves. To a lower strength, "Skip Distances" are areas generally within close range of the transmitting station, where the station cannot be received. The length of the skip distance varies with the wavelength and the situation of the station.

These short waves are comparatively free from interference from atmospherics, i.e. electrical disturbances in the air which interfere with the reception of the wireless waves.

Medium Waves.

The medium waves need much higher power than the short waves but are subject to less fading. The range is limited when compared to the shorter waves: atmospherics are much more pronounced.

Long Waves.

With sufficient power, the long wave transmissions have a long distance range, but are more susceptible to atmospherics.

Before one can draw conclusions from the various wavelength characteristics it is necessary to return once more to the frequency. If a number of stations are working in the same area there must be some control to prevent one station interfering with the other. It is generally stated that they are working on different wavelengths which is correct, but, in working out the wavelengths or metres of separation, the wireless engineer works purely on frequency. Supposing we have three transmitting stations working in the same area: it is decided that the difference between each station must be, say, 50 kilocycles, to prevent interference. Now we will work these 50 kilocycles back into wavelengths of the different classes.

Wavelengths Frequencies metres kilocycles Frequency Wavelength in Kilocycles in Metres

Short wave: Station 1 ... 20,000 15 " 2 ... 19,900 15,004 " 3 ... 19,900 15,075 Medium wave: Station 1 ... 8,000 100 " 2 ... 2,950 101.7 " 3 ... 2,900 103.4 Long wave: Station 1 ... 275 800 " 2 ... 325 923 " 3 ... 275 1,091

And we see that if those three stations were on short waves they could work on 15, 15,004 and 15,075 metres wavelength; on the medium waves 100, 101.7 and 103.4 metres wavelength; and on the long waves 800, 923 and 1,091. Actually stations would have to be separated by something round about 500 kilocycles or more but the figure of fifty was taken so as not to confuse the reader by changing the kilocycles in the long wavelengths into cycles—*Panang Gazette*.

The radio waves have peculiarities according to wavelength, or expressed more technically, according to frequency. Apart from the experiments now being carried out on a wavelength of 7 metres, the transmitting stations can be classed in four groups: (a) short wave, (b) medium wave, (c) long wave, and (d) extreme long wave commercial. These classes can be roughly given as

Wavelengths Metres. a. Short wave ... 15—100 b. Medium wave ... 100—800 c. Long wave ... 800—2,000 d. Extreme wave ... Over 2,000

Frequency Kilocycles a. Short wave ... 20,000—3,000 b. Medium wave ... 8,000—375 c. Long wave ... 2,000—150 d. Extreme wave ... 150 & below

It will be noticed that as the wavelength in metres increases so the frequency in kilocycles decreases.

Short Wave. It has already been mentioned that experiments are being made on a wavelength of 7 metres. The feature of this wavelength appears to be that the range of signals is limited to a short distance of about 25 miles only.

The short waves between 15 and 100 metres are capable of being transmitted for very long distances if we were under the impression that they do not return. There are few of them, under the present system of programmes, that we desire to

encounter for a second time. Most transmitted for very long distances of us were under the impression that they vanished on the outer boundaries of the atmosphere a long distance of fading in the atmosphere another sphere. It would appear that the signal used for those periods of time that the signal is lost, it is lost.

Short Wave. By the strength of the signal, we can determine the distance of the signal. The signal is strongest when the signal is strongest.

Short Wave. By the strength of the signal, we can determine the distance of the signal. The signal is strongest when the signal is strongest.

**LAW LORDS ON
DOG LORE.**

Cats Which Walk
Alone.

VIEWS ON RIGHTS OF OWNERS.

The Law Lords had before them recently an appeal which led to a display of knowledge of dog and cat natures and to important pronouncements on the subject of the rights of both dogs and owners.

Mr. Oliver George Fardon, of Wembley, the appellant, was passing a car, in which was an Airedale dog, near Oxford Street, W., when the dog sprang up and broke a window. A splinter of glass entered Mr. Fardon's left eye, and the sight was destroyed. The car and the dog were the property of Mr. Harcourt-Rivington, of Langham Street, W.

A jury in Mr. Justice Talbot's Court in the King's Bench Division awarded £2,000 against Mr. and Mrs. Harcourt-Rivington who were granted a stay of execution on condition that they paid Mr. Fardon £200 in any event.

The Court of Appeal quashed the verdict, and entered judgment for Mr. and Mrs. Harcourt-Rivington, holding that there had been no negligence to justify an award of damages.

Against this Mr. Fardon appealed to the House of Lords.

There were present Lords Dunedin, Warrington, Atkin, Macmillan, and Thackerton.

Mr. Martin O'Connor, with whom were Miss Constance Colwill and Mr. Hector Hughes, K.C., of the Irish Bar (instructed by Messrs. Darracotts), were for Mr. Fardon, and Mr. J. F. Eales and Mr. Wilfrid Bennett (instructed by Messrs. Watson, Sons and Room) were for Mr. and Mrs. Harcourt-Rivington.

Lord Dunedin said that a dog was not necessarily angry when it barked. He had a large acquaintance with dogs and knew them well.

Lord Warrington—I have a dog that barks most furiously whenever he is taken for a walk.

Mr. O'Connor—But this dog was infuriated.

The Well-Trained Dog.

Lord Dunedin—Dancing about and barking furiously is not, for a dog, the same thing as being infuriated. If a dog is well trained and has a wish for anything he indicates his preference modestly at first; but if he is disregarded he may make a great noise about it. He is only adopting his proper means of drawing attention.

Lord Warrington—This dog was quite used to being taken out in cars.

Lord Dunedin—And was just as likely to be irritated by being left so long unattended as to be irritated by passers-by. That is one of the results an owner might have thought probable if he left a dog alone in a closed car for long.

Lord Macmillan—There is nothing against this dog's character. He had no previous convictions.

Mr. O'Connor—A witness gave evidence on the risk of the dog's behaviour.

Lord Macmillan—Was he an expert in canine conduct and morals?

Lord Atkin—What did the man mean by risk?

Lord Dunedin—This dog was quite used to being taken out in cars.

Lord Dunedin—And was just as likely to be irritated by being left so long unattended as to be irritated by passers-by. That is one of the results an owner might have thought probable if he left a dog alone in a closed car for long.

Lord Macmillan—There is nothing against this dog's character. He had no previous convictions.
